|---------------------------------|---|
| A ttitude - | I always do my best. |
| R esilience - | I am motivated and confident. |
| I ntegrity - | I am honest, kind and caring. I treat all people with respect even when they are different from me. |
| A ccept responsibility - | I am organised and on task. |

I am an ĀRIA student

Welcome to Week 10

* **Welcome to the last week of term...** Enjoy the holidays with your children and hopefully you all stay healthy. It's been a very challenging term with the declining attendance of our students, largely due to ill-health. Maybe a two week break will break the cycle!

* **Mid-year reports and assessment folders...** will be sent home with students on Thursday. If for some reason your child is not at school could you please phone the office and arrange the collection or delivery of these.

We will arrange for interviews early next term. You will be phoned by one of the staff.

* **Science Fair...** All science boards were displayed today ready for judging tomorrow.

The hall will be open from 3.00pm - 5.00pm today and tomorrow for viewing as well as from 8.00am - 10:30am on Wednesday prior to Prizegiving at 10:30am. If you can only view outside of these times please contact me directly.

* **Pirates of the Curry Bean...** Most auditions were completed last week, however with absences it has been a difficult task. Hopefully I can confirm all parts, apart from some minor ones, by the end of week. It is expected that all students will practice their parts in the holidays.

If students find themselves without scripts do not hesitate to contact me and I will send you a digital copy. It is very important that all children take responsibility for this as there are some challenging parts, even for our year 2-3 students.

**Have a great week,
Pam Voyce.**

Thursday 25th August

2022 Senior Camp - Year 4-6
Motutapu Island
19th - 23rd September
Fees \$175.00 per person

JUNIOR A - WILDCATS

A disappointing loss for the team after having such a strong season. However an awesome achievement, finishing 2nd place in the competition and the girls should be proud of themselves and their teammates.

Player of the Day: Piper Terry
Fair Play of the Day: Chloe Darke

Final score 5-1 to SJR Black Sticks (St Jo's/Rangitoto).

Dani Darke - Coach

JUNIOR B - TIGERS

What a season! Some great hockey played, a lot of close games and fun had by all. We made it all the way to the final, unfortunately going down 1-0 to Te Kuiti Flashsticks.

Throughout the season the girls improved markedly. This was apparent in a hard fought final where we had our chances against a team that soundly beat us 6-1 in the round robin. I can't fault the players' commitment, whether putting their bodies on the line in defence or keeping the ball in play. I would also like to thank our supporters for their positivity in supporting the team, the opposition and officials.

Phil Watkins - Coach

SCHOOL NOTICES

HAPPY BIRTHDAY

to the following children who celebrate their birthday.

We hope you all enjoy your special day!

Hendrix Tapara
Lucas Foreman
Indy Brooks

THANK YOU

A massive thank you to Anthony & Dani Darke for the donation we have received through the stock scheme (steer grazed).

LIBRARY BOOKS

Could **ALL** school library books please be returned to school by **WEDNESDAY!!**

A BIG thank you

to Shoppington in Te Kuiti for the donation of 10 AMAZING prizes for our Science Fair.

We really appreciate your support !!

Christchurch 8411
Freephone: 0800 88 99 84
Faxes: 0800 88 99 84
www.northfuels.co.nz

Ongarue School is excited to be a part of the Fuel for Schools programme. It's very simple. Northfuels customers can nominate a participating school to receive 50 cents for every 100L of bulk fuel they have delivered. So as you keep your wheels turning you are giving back to your local community too, and we'd love your support!

Once a participating school reaches their \$1,000 target / goal they can redeem from the 40 plus technology and sports packages on offer. It's just that simple. The more people involved and nominating our school the sooner we will be rewarded.

Talk to our local Account Manager Kelly Brears for more information on the Fuel for Schools programme, fuel, tanks, health and safety or any of your bulk fuel requirements. she's happy to pop out and have a chat!

1–3 days

5–21 days, usually
7–10 days

This disease is spread by ...

Coughing and sneezing and direct contact with respiratory droplets.

Coughing and sneezing.
Also direct contact with the nose/throat secretions of an infected person.

Close physical contact, such as kissing. Sleeping in the same room.

Contact with infected saliva, eg, coughing, sneezing, kissing and sharing food and drink.

Contact with infected person's skin, clothes or personal items. Also through contaminated floors and shower stalls.

Coughing and sneezing.
Also direct contact with the nose/throat secretions of an infected person.

Undercooked food (eg, chicken and meat); food/water contaminated with faeces from infected person or animal; direct spread from infected person or animal.

Direct skin contact with the infected person, and sharing sheets and clothes.

Coughing and sneezing. The virus may be passed from mother to child during pregnancy.

Usually contact with the secretions of a strep sore throat. Sometimes through contaminated food.

Coughing. Adults and older children may pass on the infection to babies.

Early signs

Sudden onset of fever with cough, sore throat, muscular aches and headache.

Running nose and eyes, cough, fever and a rash.

Generally unwell, fever, headache, vomiting, sometimes a rash.
Urgent treatment is required!

Pain in jaw, then swelling in front of ear and fever.

Flat spreading ring-shaped lesions.

Fever, swollen neck glands and a rash on the face, scalp and body.
Rubella during early pregnancy can cause abnormalities in the baby.

Stomach pain, nausea, fever and diarrhoea.

Itchy rash in places such as forearm, around waist, between fingers and buttocks and under armpits.

Red cheeks and lace-like rash on body.

Headache, vomiting, sore throat.

Running nose, persistent cough followed by "whoop", vomiting or breathlessness.

How long is the child infectious?

From 1 day before, up to 7 days after illness onset.

From the first day of illness until 4 days after the rash begins.

For 24 hours after antibiotics are started.

For one week before swelling appears until 9 days after.

While lesions are present, and while fungus persists on contaminated material.

From 7 days before rash starts until at least 4 days after it has appeared.

Until well, and possibly weeks or months after.

Until 24 hours after treatment is started.

For variable time up to appearance of rash.

For 24 hours after antibiotics are started.

From runny nose stage and for 3 weeks after onset of cough if not treated with antibiotics, or until 5 days of antibiotic treatment.

Exclusion of child from kindergartens, schools, etc

Restrict contact activities until well.[†]

At least 4 days from onset of rash.

Until well enough to return.

Until 9 days after swelling develops, or until child is well, whichever is sooner.

Restrict contact activities, eg, gym and swimming, until lesions clear.

7 days from appearance of rash.

Until well with no further diarrhoea.[†]

24 hours after treatment is started.

Unnecessary unless child is unwell.

Until 24 hours after antibiotics started.

21 days from onset of coughing, or after 5 days of antibiotics.

usually 2–3 months

Usually a few days,
variable

Early signs

Stomach pain, fever and diarrhoea.

Fever and spots with a blister on top of each spot.

Irritation and redness of eye. Sometimes there is a discharge.

Stomach pain and diarrhoea.

Vomiting, diarrhoea and fever.

Sore throat, swollen glands in the neck, fever. Vague ill health for some time.

Fever, rash on soles and palms and in mouth. Flu-like symptoms.

Nausea, stomach pains, general sickness. Jaundice a few days later.

Similar to Hepatitis A.

Scabby sores on exposed parts of body.

How long is the
child infectious?

Until well, and possibly several weeks after.

From up to 5 days before appearance of rash until lesions have crusted (usually about 5 days).

While there is a discharge from the eyes, the child is infectious.

Until well, and possibly several weeks after. *Giardia* can be cleared by medication.

While vomiting and diarrhoea last, and up to 8 days after illness starts.

Prolonged – possibly for one year or more.

While the child is unwell and possibly longer, because virus is excreted in faeces for weeks after.

From about 2 weeks before signs appear until 1 week after jaundice starts.

Blood and body fluids may be infectious several weeks before signs appear, until weeks or months later. A few people are infectious for years.

Until 24 hours after treatment with antibiotics has started or until sores are healed.

Exclusion of child
from kindergartens,
schools, etc

Until well with no further diarrhoea.[†]

For one week from date of appearance of rash.[†]

While there is a discharge from the eyes.[†]

Until well with no further diarrhoea.[†]

Until well with no further vomiting or diarrhoea.[†]

Until well enough to return.

While the child is feeling unwell. Unnecessary if the child is well.[†]

7 days from the onset of jaundice.[†]

Until well.[†]

Until 24 hours after treatment has started.[†]
